

How a 96 year old Texas-based electrical contracting company improved processes with automation.

80%

saved on administrative overhead costs associated to safety certification management.

myComply

Background

Mary Begnoche is the Safety and Compliance Administrator for one of Texas' largest electrical contractors, Alterman Inc. She has been with the company for a handful of years, and manages the company's 800+ field workers training certifications and safety documentation.

Founded in 1923, Alterman Inc. has a long history of service to the San Antonio and South Texas area, they complete a diverse cross section of commercial and industrial projects. Alterman has built a business on foundational components like great service, superior workmanship, and a commitment to safe work.

Objective

Alterman was looking for a way to manage their workers' training certifications more efficiently, **with expiration updates** to ensure they are always compliant and **proactive with the oversight of training renewals.**

"I was working with spreadsheets or other software that wasn't exactly accomplishing what I needed in terms of expiration alerts and detailed certification tracking. I was trying to come up with a better way to manage employee training information and documentation, than the processes that had previously been in place for the past 96 years."

- Mary Begnoche, Safety & Compliance Administrator, Alterman

Time Savings & Overhead

When tasked with manual processes, your day can easily get away from you. **Imagine saving weeks worth of time** by adding a solution built for safety administrators, like our friend Mary.

Mary Begnoche has stated that some of the work she previously managed over a couple of weeks can now be accomplished in a matter of a couple days. myComply is built for admin teams, safety managers, and anyone who feels stuck reactively managing a team's certifications and training renewal.

The product continues to be refined with feedback from users, like Mary, making it a fit to **transition spreadsheet management to automated cloud-management.**

"I have cut various administrative tasks that may have taken up to 2 weeks down to about 2 days using myComply."

"If someone needs information about a worker, I am no longer stuck with digging through personnel files. I can find what I need or run a report in 10 seconds."

- Mary Begnoche, Safety & Compliance Administrator, Alterman Inc.

Quick & Painless Data Migration

Upload

250

**New
Workers**

30

Minutes

Administrative teams know the burden faced when a company hires rapidly - it can be a lot of work. Mary has noticed she spends far less time moving information around since adopting myComply. Time-consuming endeavours such as onboarding new worker safety information has become much easier:

“We onboard and hire a lot of employees, and recently we had to scale up another 250 workers for a large project. In doing so, we have to enter a ton of information into various systems. Now, using myComply we are able to mass upload a lot of the information such as their name(s), related training certifications, and all of their documents. I went from a group of employees taking 2-4 days getting them uploaded, to around 30 minutes.”

- Mary Begnoche, Safety & Compliance Administrator, Alterman Inc.

"I am doing a lot of the manual work I used to do in not even 1/10th of the time it was taking me before adopting myComply. myComply has really been a life-saver for me, my only regret is not finding it sooner."

- Mary Begnoche, Safety & Compliance Administrator, Alterman
