- ◆ Avoid costly penalties with audit ready software
- ◆ Collect activity & certifications from all workers on your site
- ◆ Automatically populate your LL196 daily log(s) for DOB

myComply

www.mycomply.net

myComply's offering goes WAY beyond hardware. myComply is a complete solution for Local Law 196, designed for contractors to gather important compliance information and data associated to **protecting a work site from STOP WORK ORDERS and COSTLY AUDIT PENALTIES.**

In addition to access control solutions, myComply has built a software interface trusted by over 3,000 U.S. contractors for compliance data management. This same software powers your access control, and gives you live insights into the activity of your job site(s). Some of the largest contractors in New York City use myComply, ask us which job sites you can see our product!

Site Protection & Durability

Premium stainless steel turnstiles safeguard your job site and are durable throughout the lifetime of your project. *Get your turnstile fixed to a skid & delivered to site!*

Subcontractor Accountability

Ensure all sub-trades, and associated workers have the proper training. Our access control verifies worker training as workers check-in to site.

Significant Cost Savings

We save contractors from financial penalties, along with protecting job sites from costly stop work orders.

myComply's access control is developed specifically for NYC contractors. Why is this important? We bring in the data YOU NEED, to comply with LL196 and avoid costly penalties and potential stop work orders.

Off the shelf access control is built to work for anyone, our access control is built to work for New York City and is continuously developed to give NYC contractors tight oversight into the compliance of their job site(s). In addition, our software automatically prepares the attendance reports mandated by the Department of Buildings.

Recognize these? Every worker will need an SST Card in NYC by Sept, 1st 2020.

NYC's Solution

State-of-the-Art Access Control for NYC

This is not an out of the box solution, we built this for NYC. Try our solution on an upcoming project and we will show you!

Smart Badges & SST Cards to Check-In

Take attendance, and grant/deny access to individuals based on their credentials stored in Smart Badges & SST Cards.

Certification Expiration Tracking

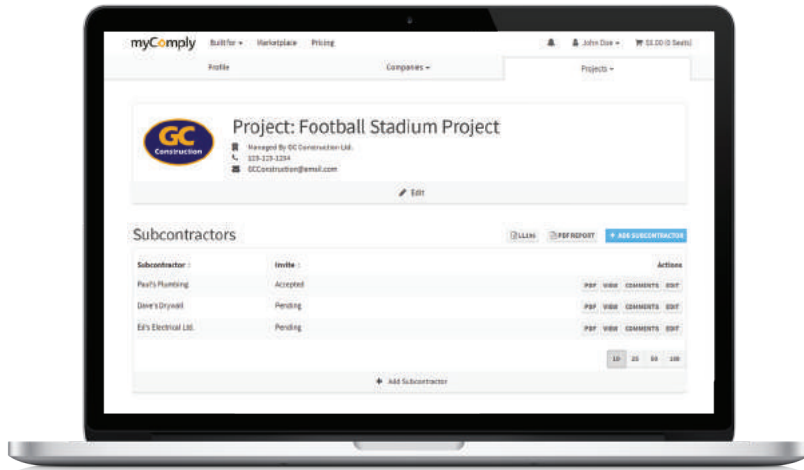

Get an overview of every certification that every worker has, in real-time. Deny access to workers who aren't adequately trained.

Detailed Reports & LL196 Daily Logs

Run various reports, including the daily attendance report required by the DOB.

80% Cost Savings on Overhead Associated to Onboarding

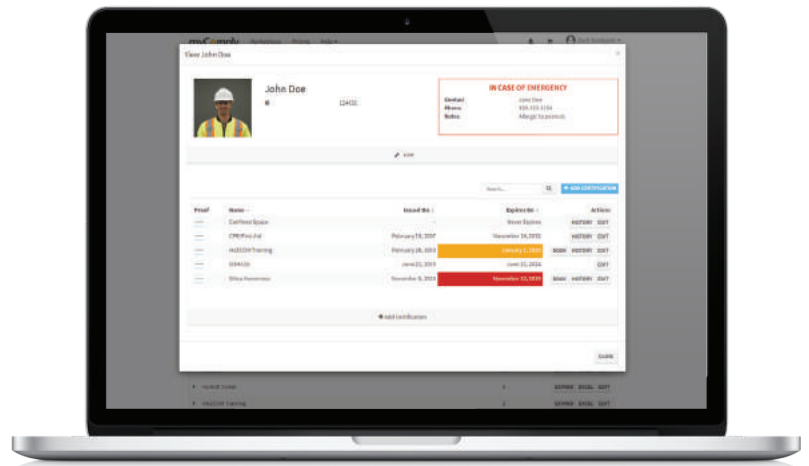

Project(s) Overview & Subcontractor Onboarding

myComply saves General Contractors 80% on overhead costs associated with gathering subcontractor documentation and worker certifications. Store all the compliance information you need to access in one place.

Detailed Worker Profiles, Outlines Proof of Training

myComply ensures all workers on your site are approved to be there, and have the up-to-date training. Store emergency contact information, and ensure you know who is on your site and the training that they have at all times.
