myComply

# Background

The Bozzuto Group is an experience-focused real estate company distinguished by their innovative developments, dedicated customer service and top-rated workplace culture. With award-winning expertise in homebuilding, multifamily development, construction and management, Bozzuto is devoted to delivering extraordinary experiences for those they serve.

Since their founding in 1988, Bozzuto has developed, acquired and built more than 50,000 homes and apartments. Celebrating 32 years of creating sanctuary for their residents, Bozzuto currently manages 80,000 apartments and 2.5 million square feet of retail space along the East Coast, including Washington, D.C., Baltimore, New York City, Chicago, Miami, Philadelphia and Boston. [www.bozzuto.com](http://www.bozzuto.com).

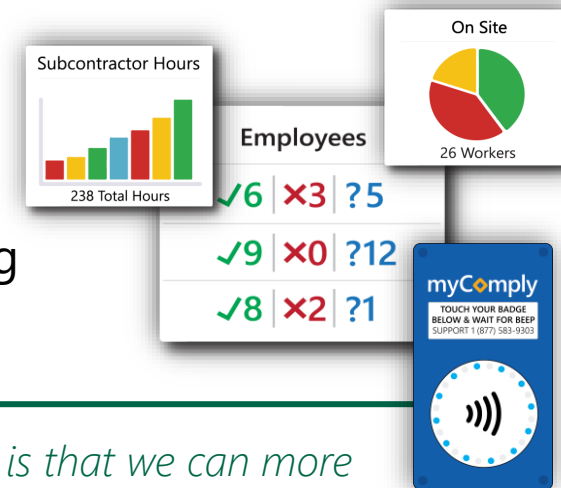

Bozzuto and myComply began working together in 2020 and actively collaborate on projects in Pennsylvania, Virginia, Maryland, and Washington D.C.

## Pain Point

**Lacking an automated solution that enables Bozzuto to gather more accurate on-site data** in regards to time, training, and measured compliance of workers on a project.

## Solution

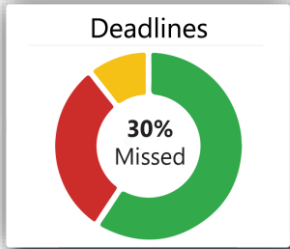

A combined use of myComply's software and hardware to identify who is on-site, the training that they have, and when they were there.

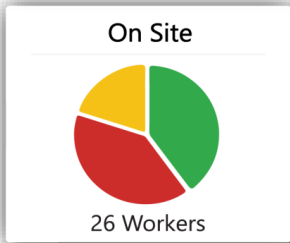

*"What's really attractive about myComply for Bozzuto is that we can more precisely track our manpower on our projects. Not only does this help us with safety and claims, but it helps increase our accuracy on production estimates to save us time and money."*

- Nathan Slavin, Director of Safety, Bozzuto Construction

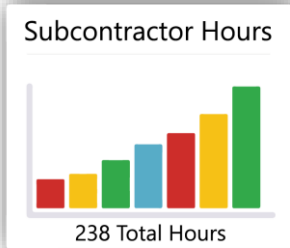

# myComply Spotlight: Bozzuto Construction

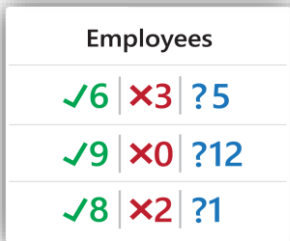

- Bozzuto has the ability to identify companies who have not submitted compliance documents on time during the onboarding process.

- Bozzuto knows who is on the job at any time, with real-time attendance insights in the myComply dashboard.

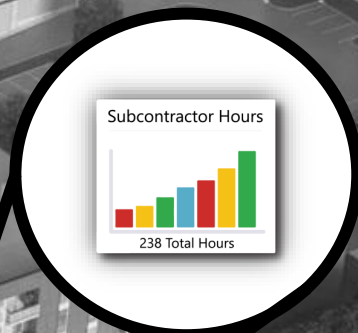

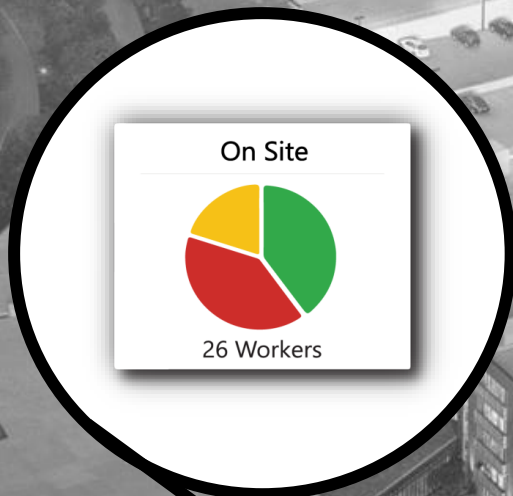

- Bozzuto can easily measure the total hours that a subcontractor spends on the job each day.

- Bozzuto can approve, reject, or view pending submissions from subcontractors on projects. This ensures only approved workers check-in on-site.

# The Kiosk

The myComply kiosk is built to **gather attendance data and site information anywhere**. It's remote cellular connectivity allows for data processing and links to myComply's intuitive dashboard on any job.

*"In our business, safety is priority. It is very important to know who is working on our jobsites and when – so, we were looking for a way to ensure our manpower counts were as accurate as possible. We found our solution with myComply."*

*"This technology has made the project compliance process easier for our teams by automating much of the administrative work."*

- Nathan Slavin, Director of Safety, Bozzuto Construction

# The Kiosk

## Plug & Play

- The kiosk is designed to work on any site, anywhere. Plug the kiosk in, link it seamlessly to the project you're on, and start gathering on-site data immediately. The kiosk's cellular connectivity allows it to be versatile and still reliable.

# COVID-19 Control

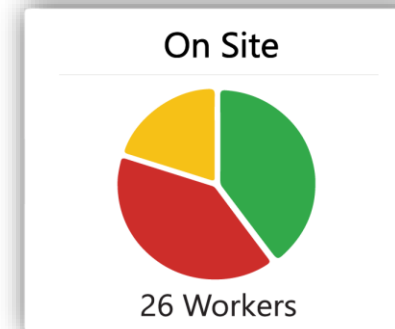

*"In regard to COVID-19, we are using myComply to assist with temperature screening and contact tracing. Each day we collect a site map from our subcontractors that shows where their crews are working. When we combine myComply's on-site reports with this map, we can identify people who may have been impacted by potential exposure to COVID."*

*Recently, when we had an asymptomatic COVID case occur on-site, we were able to isolate the worker's activity to three specific units on the first floor of the project. This allowed us to quickly and accurately target these areas, have them professionally cleaned, and inform nearby workers to help limit the possibility for additional exposure."*

- Nathan Slavin, Director of Safety, Bozzuto Construction

## myComply: COVID-19 Solutions

- Hardware for automatic mask and temperature verification (Temproscreen – Left Image)
- Attendance tracking to aid with contact tracing and on-site exposure limitation (Dashboard – Middle Image)
- Daily health screening surveys that are completed by workers on-site to ensure potential infected workers are not on-site (Mobile Survey – Right Image)

*"We were able to implement myComply quicker than we could of with any other system like it. This allowed us to track what we wanted on fast-approaching upcoming projects.*

*myComply allows us to have input directly with the product team. If there is something that doesn't work efficiently in the system for us, it's a short conversation with our success rep and myComply's product team. They work quickly to make the system more user-friendly for us."*

- Nathan Slavin, Director of Safety,  
Bozzuto Construction
